## PROFESSIONAL EXPERIENCE

---

African Marine Mammal Conservation Organization - San Francisco, CA

Nov 2023 - Present

### Full Stack Software Engineer

- Designed and implemented high-performance RESTful APIs in Symfony PHP backend, ensuring fast response times and precise data delivery. Optimized SQL queries for efficiency and used PHPMyAdmin to test query accuracy.
- Developed front-end new features with pixel perfect user interfaces with React, HTML, and CSS.
- Collaborated cross-team with product, UX designers, and other engineering teams to clarify or challenge requirements.

Evolphin Software - San Ramon, CA

Oct 2023 - Present

### Frontend Support Engineer

- Implemented the full-cycle integration of HubSpot CRM with our internal applications and CMS websites, from requirements gathering and system design to implementation and maintenance.
- Developed and deployed an AWS Lambda function to facilitate the technical integration with HubSpot API.
- Documented high level design and implementations for better team collaboration and future reference.
- Provided technical support across teams using different tools and softwares, including, Webflow, Wordpress, Intercom, Hubspot, Datadog, Google Tag Manager, NextJS, and AWS lambda.
- Researched, compared, tested, and recommended software products based on team requirements and usage.

Evolphin Software - San Ramon, CA

Feb 2023 - Aug 2023

### Software Engineer Intern

- Collaborated to develop and debug reusable React components, including bug tickets, enhancements, and other technical supports, following modularity, and maintainability in our code base using TypeScript, React, Next.js, HTML, CSS, and Git.
- Collaborated closely with cross-functional teams to implement Intercom chat bot automations and configurations.
- Leveraged AWS Amplify for implementing event-driven programming to collect and manage events within the application.
- Collaborated with integrating 3rd party web analytics tools such as Datadog RUM on the website and the web application.

Pain and Rehabilitative Consultants Medical Group - Emeryville, CA

Nov 2015 - Nov 2017

### Medical Assistant

- Provided clinical and administrative support to multiple providers using Intelligent Medical Software (IMS).
- Effectively communicated messages between patients, departments, and outside facilities.
- Exceptional patient care and problem-solving skills, managing up to 30 patients daily.

## EDUCATION

---

**Full Stack Software Engineering Program** - App Academy, San Francisco, CA | Mar 2021

**Course Highlights:** Full-stack Web Development, REST API, User Authentication, Test Driven Development, Databases.

**B.S. Computer Science** - Kabul University, Kabul, Afghanistan | Dec 2010

**Course Highlights:** Software Engineering, Java, C++, Database, Web Design, Data Structures and Algorithms, Computer Networks.
