Software Engineer Intern with a degree in Computer Science, Full Stack Software Engineering bootcamp training and 4+ years professional experience in Health Care, Research, and Education. Proven ability to build high-quality software projects that demonstrate my strong analytical skills and passion for innovative technologies. Seeking to leverage my experience, education, and enthusiasm for software development to drive business success and make a positive impact.

EXPERIENCE

Software Engineer Intern

Evolphin Software - San ramon, CA

Feb 2023 - Present

- Collaborated with a cross-functional agile team to develop, test, and maintain reusable React components in our web application that met user requirements and delivered business value.
- Analyzed and resolved application defects using debugging tools and problem-solving skills to ensure optimal performance and user satisfaction.
- Utilized TypeScript, Next.js, HTML, CSS, and Git to develop a scalable and maintainable application that aligned with industry standards and best practices.
- Leveraged event-driven programming techniques to implement comprehensive tracking of user behavior, empowering the business team to make data-driven decisions and drive sales growth.
- Streamlined the process of utilizing Intercom for developers, documenting and optimizing its features for scalability and maintainability, resulting in increased efficiency and ease of use for the team.
- Demonstrated a proactive approach to learning new technologies and concepts to improve overall performance and contribute to team success and actively contributed to code reviews and peer programming sessions to learn from experienced team members and enhance development skills.

EDUCATION

Web Development - App Academy, San Francisco, CA

March 2021

Immersive software development course with a focus on full-stack web development, which entailed 1000+ hours of coding

Bachelor of Science in Computer Science - Kabul University, Kabul, Afghanistan

Dec 2010

SKILLS

JavaScript, TypeScript, React, Redux, HTML, CSS, Ruby on Rails, PostgreSQL, MongoDB, Object-Oriented Programming, AWS, Git

PROJECTS

Uniqsy (Ruby on Rails, PostgreSQL, AWS, React, Redux)

[live](#) | [github](#)

Full-stack clone of Etsy.com, online platform for buying and selling handmade or vintage items

- Developed and optimized application functionality by designing and implementing backend, creating RESTful APIs, and building frontend routes and reusable components with React-Router and React.
- Implemented secure media storage and organization on AWS by connecting the Rails backend with AWS IAM.

Goal Garden (Node.JS, React.JS, Express, MongoDB)

[live](#) | [github](#)

Interactive spaces for goal progress visualization and journaling

- Developed and designed frontend components using React, Redux, and Axios for efficient data manipulation and user authentication forms. Collaborated with a team of four to deliver a full-stack web app within five days using Git and agile methodology.

Movflex (JavaScript, D3.JS, HTML, CSS)

[live](#) | [github](#)

Interactive data visualization on Netflix movies in different categories

- Utilized Webpack and Babel to ensure a reliable user experience (UX) on multiple web browsers, and created interactive graphs for each category using D3.js.
